Software Engineering Undergraduate with a strong focus on Quality Assurance. Experienced in manual testing and automation using Selenium, with a proven ability to design and execute detailed test plans to ensure software excellence.

EDUCATION

BSc (Hons) Software Engineering
NSBM Green University, Sri Lanka *2023 – 2027 (Expected)*

- Relevant Modules: Object-Oriented Programming (Java), Web Development, Database Management, Software Quality Assurance

---

PROJECTS

Manual Test Suite - HackerNoon

- Authored 10+ detailed manual test cases for the HackerNoon platform, covering core features like Search, User Authentication, and UI components.
- Performed Positive and Negative testing (e.g., valid search vs. invalid search strings) to ensure system robustness.
- Validated UI/UX elements including theme toggling (Dark/Light mode), navigation menus, and social media integrations.
- Documented test steps clearly to ensure reproducibility and identified potential edge cases in the user login and newsletter subscription flows.

Selenium WebDriver Automation Suite

- Developed a robust automation framework using Java and Selenium WebDriver.
- Implemented Page Object Model (POM) to enhance script maintainability and reusability.
- Conducted automated functional testing for web applications, focusing on reliability and performance.

RoyalBidz — Modern Jewelry Auction Platform

- Developed a real-time full-stack auction engine using .NET 8 and React 18 featuring live bidding via SignalR WebSockets.
- Architected a secure MySQL backend with EF Core (Repository Pattern) and JWT-based Role-Based Access Control.
- Integrated automated transactional email systems and notifications using MailKit/SMTP.
- Tech Stack: C#, .NET 8, React, MySQL, SignalR, EF Core, JWT.

TECHNICAL SKILLS

- QA & Testing: Manual Web Testing, Test Case Design & Execution, Bug Life Cycle, SDLC/STLC, Smoke, and Regression Testing.
- Automation: Selenium WebDriver (Java), Cypress, Playwright, Page Object Model (POM)
- Programming & Web: Java, JavaScript ,React.js, HTML, CSS, MySQL.
- Tools & Version Control: Git, GitHub, Docker (Basic), VS Code, Postman (Basic API Testing).

CERTIFICATIONS

- ISTQB 4.0+ Foundation Certification Prep – LinkedIn Learning (2026)
- Python for Beginners – University of Moratuwa (2026)
- Docker Fundamentals for Testers – Docker 101 (2026)
- API Testing & Learning 101 – API Learning (2026)
- Web Element Locator Strategies – Test Automation University (2026)
- Introduction to Cypress & Playwright – Test Automation University (2026)

SOFT SKILLS

- Attention to Detail: High precision in identifying UI/UX inconsistencies and functional bugs.
- Analytical Thinking: Strong problem-solving skills to trace and document complex issues.
- Effective Communication: Ability to provide clear, actionable bug reports and feedback.
- Team Collaboration: Proven ability to work effectively in team-oriented environments.
- Adaptability: Fast learner of new testing tools and industry best practices.
